

26 November 2007

Liberal Party of Australia

P.O.Box 6004 Kingston ACT 2604

Dear Sir,

Warning about terrorist attack by supporters of Liberal Party

I believe that Liberal Party cares about the National Security of Australia and never think about attacking to Australia. This warning letter is not about Liberal Party as a whole but it is about few supporters of the liberal party.

I have heard that few supporters of the liberal party have been talking about a plan for attacking to Australia in the future and pretend that Muslims as terrorist acts have done that. Whether this is true or not, it is important to be careful and monitor some particular people and places.

The advantages of this conspiracy are:

1. To show to the Australians and to the world that during the time that Liberal Party was governing, there was not any successful terrorist attack to Australia and Liberal was able to protect the country but Labor is unable to do so.
2. To Show to American people that in the upcoming American election if they don't vote to republicans and if they change the system as the Australian people did, the Americans should expect another September 11 in the future. So some Americans prefer not to vote for Democrats fearing that the same story in Australia doesn't repeat in USA.
3. For revenge from Labor Party and the defeat in election 2007.
4. For revenge from Muslims who supported Labor and voted for this Party.
5. To give a bad image to Muslims more than the past.
6. To prepare the conditions and environment ready for the next federal election and make Australians believe that they should vote for Liberal if they want Australia to be a safer country.

And few other advantages.

To prevent such a plan

We should not ask only one specific organisation to monitor and check. AFP alone, or ASIO alone is not enough. It must be few organisations together and each of them should be able to monitor the other one. The reasons:

- A. Recent corruption in ASIO regarding Mr. Izhar Ul Haqe shows that we can't trust ASIO as a perfect organisation and 100% trustable without any corruption and misconduct.

- B. Recent bungles and question marks about Dr. Mohammad Haneef's case shows that we have the same concern in AFP.
- C. Some members of some organisations are under influence of Liberal party and there is possibility that not only they do not monitor and investigate the suspects properly but also cooperate with them.
- D. Some managers with high governmental positions feel their jobs are insecure in these days and they are expecting to lose their positions any time. This can encourage them to help the suspects.

And few other reasons.

At the moment it is not important that how many percents this plan is true or who are exactly those suspects but it is important to monitor and be careful at this stage.

The Department of Defence should be monitored more than any other departments. I warn Australia about the Department of Defence and any organisation or individual that legally can have access to explosive materials.

Once again I repeat that I don't mean that Liberal Party of Australia is that evil that is happy to explode Australia for political benefits of the party in the future. No, I don't believe this. What I meant was about few particular supporters of Liberal. Human being makes mistake. We can't say: "No it is impossible any supporter of Liberal explodes Australia". Can you guarantee that such a thing never happens? If anyone can guarantee that there is no any possibility that supporters of Liberal attack to Australia, he/she accepts the full responsibility for that when the terrorist attack happens. Have you forgotten about the Lindsay pamphlet scandal? Don't say: it is not possible. Sometime human being who is very involved with the politics does EVERYTHING to reach his/her goals and doesn't care the tactics are human or unhuman.

Kind regards

Sheikh Haron
